

Beck.

The adjustable differential pressure switches in Ex zones.

Differential pressure switch 930..Ex Climair®

with adjustable switching pressure for
Ex zones 1, 2 and 21, 22

Applications

Adjustable differential pressure switch for monitoring overpressure, vacuum and differential pressure of air or other non-aggressive, combustible gases.

Possible fields of application include:

- Monitoring air filters and ventilators
 - Monitoring industrial cooling-air circuits
 - Overheating protection for fan heaters
 - Monitoring flows in ventilation ducts
 - Controlling air and fire-protection flaps
 - Frost protection for heat exchangers
- Ex zones 1, 2 and 21, 22 with ATEX type examination

Technical Specifications

Medium	air, non-combustible and non-aggressive gases
Temperature ranges Medium and ambient temperature	-20°C to +85°C
Storage temperature	-40°C to +85°C
Switching pressure ranges	20 - 300 Pa (minimum) 1,000 - 5,000 Pa (maximum)
Switching differential	10 Pa minimum 250 Pa maximum depending on pressure range
Switching pressure tolerance	±15% from setpoint, Min. ±10 Pa
Max. working overpressure	10 kPa
Pressure connections	2 plastic hose ports
Outer diameter	6.0 mm
Materials Diaphragm	silicone, tempered at 200°C free of gas emissions (other materials on request).
Pressure switch housing	PA 6.6
Cover	PS
Weight	150/110 g (with/without cover)
Electrical rating	24 VDC/100 mA; 30 VDC/60 mA
Electrical connections	AMP flat plug, 6.3 mm x 0.8 mm, in accordance with DIN 46244 or push-on screw terminals
Cable conduit	M20x1.5 or cap nut conduit AF20 with cable strain relief
Protection category	IP 54 (with cover)
Mechanical working life	over 10 ⁶ switching operations

ATEX

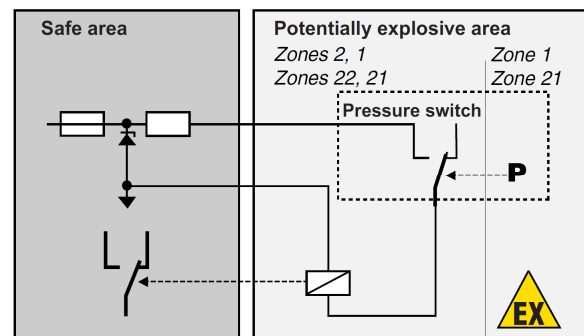

EC type examination	BVS 06 ATEX E 141X
Device category	II 2G and II 2D
Ignition protection type	Ex ia IIB T4 Gb Ex ia IIB T135 C Db
CE conformity	ATEX Directive 2014/34/EU RoHS Directive 2011/65/EU

Ex i-circuits

This pressure switch can be used in potentially explosive zones 1, 2 and 21, 22. In the safe area, an associated isolating means (separating barrier, switching amplifier) must be connected before. The entire isolating circuit must then be proved to keep inherent safety. For this purpose, the power specifications (P, I, U) of the barrier must be lower and the characteristics (L, C) higher than those of the pressure switch and of the connection line (blue colour).

Characteristics:

Gas for IIB:	30 VDC/60 mA; 24 VDC/100 mA
Dust for IIIB:	30 VDC/60 mA/0.6 W
Capacitance - Ci	0 F
Inductance - Li	0 mH

Arrangement of contacts

The switching pressure details are referred to a vertical installation position which is also recommended for pressure switches which have their connection ports below. For a horizontal installation position with AMP terminal lugs on top, the switching values are some 20 Pa higher.

The switching pressure can be set without any manometer by an adjusting knob provided with a reference scale.

With the aid of a screwdriver, the switching difference can also be adjusted.

Accessories

Metal mounting bracket, S-shaped	Article no. 6402
Metal mounting bracket, L-shaped	Article no. 6401
Snap-on plastic bracket, S-shaped	Article no. 6482
Snap-on plastic bracket, L-shaped	Article no. 6481
